**Satellite Meteorology Training in WMO RA V during 2021/2022:
The Australian VLab Centre of Excellence experience**

Bodo Zeschke BMTC

This presentation summarises the satellite meteorology training conducted by the Australian VLab Centre of Excellence over the past year. It will focus on the monthly Regional Focus Group meetings as well as collaboration with other Centres of Excellence within the context of the WMO Global Campus. Relevant topics include dissemination of the latest developments in effectively utilising regional geostationary satellite data and polar orbiting satellite data and associated resources within WMO RA V and adjacent regions. We will also review the celebration of the 100th Australian VLab Centre of Excellence Regional Focus Group meeting
