Recent activities of the International Precipitation Working Group (IPWG)

Takuji Kubota (JAXA),
Christian D. Kummerow (Colorado State University),
F. Joseph Turk (NASA/JPL)

The International Precipitation Working Group (IPWG) was established as a permanent Working Group of the Coordination Group for Meteorological Satellites (CGMS) in 2001. The IPWG is co-sponsored by CGMS and the World Meteorological Organization (WMO) and focuses the scientific community on operational and research satellite based quantitative precipitation measurement issues and challenges.

It provides a forum for operational and research users of satellite precipitation measurements to exchange information on methods for measuring precipitation and the impact of space borne precipitation measurements in numerical weather and hydrometeorological prediction and climate studies.

Here, we summarize highlights and actions of the 10th IPWG Workshop held in June, 2022 in Ft Collins, CO, USA, and present future plans of the Working Group.
