

Sample command sequence to download data using 'Wget'

1. Access to the top page as:

```
$ wget --user XXXX --password "yyyyyy" https://www.aaaaaaa.bb.cc/tops/[Nation]/top.html
```

2. Analyze top.html and get the link to the Current page. Then you get the URL:

```
http://img.aaaaaaa.bb.cc/contents/[Nation]/current.html?AP_[parameter]
```

3. Access to the Current page with saving cookies as:

```
$ wget --keep-session-cookies --save-cookies cookies.txt  
http://img.aaaaaaa.bb.cc/contents/[Nation]/current.html?AP_[parameter]
```

4. Analyze current.html and get the links to data files. For example, you get the URL:

```
http://img.aaaaaaa.bb.cc/data/42/HS_H08_20150401_0130_B14_FLDK_R20_S0110.DAT.bz2
```

5. Access to the data file with cookies as:

```
$ wget --load-cookies cookies.txt  
http://img.aaaaaaa.bb.cc/data/42/HS_H08_20150401_0130_B14_FLDK_R20_S0110.DAT.bz2
```

In the above sequence, "aaaaaaa.bb.cc" represents domain name of HimawariCloud server.
