# Himawari Monthly Operations Report November 2017

## 1. Special operation events

There was no special operation of Himawari-8 during November 2017.

## 2. Earth observation

2.1 Full disk observation

The regular schedules of full disk observation are 142 times in a day. The following tables show the results of full disk observation and a summary of canceled full disk observation during November 2017.

|                  | Full disk observation | Remarks |
|------------------|-----------------------|---------|
| Scheduled        | 4252                  |         |
| Performed        | 4252                  |         |
| Performance in % | 100.00                |         |

#### Results of Himawari-8 full disk observation

## Summary of canceled Himawari-8 full disk observation

| Date | Full disk observation | Reasons |
|------|-----------------------|---------|
|      | None                  |         |

## 2.2 Japan area observation

The regular schedules of Japan area observation are 576 times in a day. The following tables show the results of Japan area observation and a summary of canceled Japan area observation during November 2017.

|                  | Japan area observation | Remarks |
|------------------|------------------------|---------|
| Scheduled        | 17280                  |         |
| Performed        | 17280                  |         |
| Performance in % | 100.00                 |         |

## Results of Himawari-8 Japan area observation

## Summary of canceled Himawari-8 Japan area observation

| Date | Japan area observation | Reasons |
|------|------------------------|---------|
|      | None                   |         |

## 2.3 Target area observation

The regular schedules of Target area observation are 576 times in a day. The area is flexibly selected to enable prompt reaction to meteorological conditions.

The regular schedules of Target area observation are 576 times in a day. The following tables show the results of target area observation and a summary of canceled target area observation during November 2017.

|                  | 0                       |         |
|------------------|-------------------------|---------|
|                  | Target area observation | Remarks |
| Scheduled        | 17280                   |         |
| Performed        | 17280                   |         |
| Performance in % | 100.00                  |         |

## Summary of canceled Himawari-8 Target area observation

| Date | Target area observation | Reasons |
|------|-------------------------|---------|
|      | None                    |         |

- 3. Data Collection System
  - 3.1 International Data Collection System (IDCS)

The following table shows the status of reception and dissemination of International Data Collection Platform (IDCP) messages that were received in Himawari-8 area of responsibility.

| IDCP<br>channels | Numbers of<br>IDCPs <sup>a)</sup> | Received<br>messages | Error<br>messages <sup>b)</sup> | Messages<br>disseminated<br>to the GTS |
|------------------|-----------------------------------|----------------------|---------------------------------|--|
| I12              | 3                                 | 0                    | 0                               | 0                                      |
| I15              | 2                                 | 0                    | 0                               | 0                                      |
| I16              | 4                                 | 0                    | 0                               | 0                                      |
| I20              | 2                                 | 0                    | 0                               | 0                                      |
| I23              | 7                                 | 4320                 | 219                             | 4101                                   |
| I24              | 6                                 | 2879                 | 1665                            | 1214                                   |
| Total            | 24                                | 0                    | 0                               | 0                                      |

## Reception and dissemination of IDCP messages

a) IDCP numbers are those registered in Himawari-DCS as of 1 November 2017.b) No message, or message unsuitable for WMO codes.

## 3.2 Interference on IDCP channels

The following table shows interference on Himawari International Data Collection System (IDCS) channels that occurred during November 2017.

| interference on miniawar iDes channels (November 2017) |    |    |    |    |    |    |    |    |    |    |    |
|--|----|----|----|----|----|----|----|----|----|----|----|
| Channel  | 1  | 2  | 3  | 4  | 5  | 6  | 7  | 8  | 9  | 10 | 11 |
| Interference   |    |    |    |    |    |    |    |    |    |    |    |
| Channel  | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20 | 21 | 22 |
| Interference   |    |    |    |    |    |    |    |    |    |    |    |
| Channel  | 23 | 24 | 25 | 26 | 27 | 28 | 29 | 30 | 31 | 32 | 33 |
| Interference   |    |    |    |    |    |    |    |    |    |    |    |

Interference on Himawari IDCS Channels (November 2017)

Note - W: weak interference / H: harmful interference

## 4. Satellite system status

- 4.1 Satellite status
  - Himawari-8 Location: 140.7 east longitude Operational : Observation, DCP relay
- 4.2 Maneuver.
  - 1) A north-south station-keeping maneuver of Himawari-8 05:50 UTC on 6 November 2017.
- 2) An east-west station-keeping maneuver of Himawari-8 10:20 UTC on 9 November 2017.
- An east-west station-keeping maneuver of Himawari-8 22:20 UTC on 9 November 2017.
- 4) A north-south station-keeping maneuver of Himawari-8 05:10 UTC on 20 November 2017.
- 5) An east-west station-keeping maneuver of Himawari-8 21:20 UTC on 23 November 2017.
- An east-west station-keeping maneuver of Himawari-8 09:20 UTC on 24 November 2017.

## 4.3 Calibration of the visible channel

- 1) 20:40 UTC on 7 November 2017.
- 2) 20:40 UTC on 22 November 2017.

## 4.4 Orbit information

The following table shows the Two-Line Elements of Himawari-8's orbital elements.

Epoch 00:00:0.00 UTC on 30 November 2017 1 40267U 14060A 17334.00000000 .00000000 00000-0 00000-0 01192 2 40267 000.0415 117.2820 0001548 108.6548 343.8312 01.00268382 11569
